

New Addition to Single Family Home Lawrenceville, New Jersey

Project Overview

This 1,000 square foot, single story home addition and interior renovation project included a new entrance from the attached garage, new mud room with custom shelves and a new gourmet kitchen. The new addition was supported on a crawl space foundation with new mechanical systems. Exterior improvements included a new paver patio, walkway and deck attached to the addition areas. Architectural plans were prepared by the designer/builder.

Pisano Development Group provided a preliminary structural evaluation of the existing structure, structural design services for new construction, architectural coordination and construction administration services.

- Construction cost \$200,000
