

Beach House

Surf City, New Jersey

Project Overview

This new home construction project located in Surf City, New Jersey on Long Beach Island included the demolition of an existing house and reconstruction of a new three story – 5,500 square foot custom home. The project included demolition, pile foundations, framed construction, interior elevator, a roof deck and exterior site improvements.

Pisano Development Group provided consultation for construction loan services including preliminary budgeting, plan review and construction project management for the commercial lender.

- Construction cost \$900,000
