

# Single Family Home Westfield, New Jersey

## Project Overview

This home addition project located on a tree-lined street in Westfield included a 1,300 square foot - 2 story addition, with a new garage and master bedroom suite. Architectural plans were prepared by the owner which included vaulted ceilings and an open floor plan. The new addition was designed to be connected to the existing older structure with single ridge beam and integrated foundation.

Pisano Development Group provided a preliminary structural evaluation of the existing structure, structural design services for new construction, architectural coordination and construction administration services.

- Construction cost \$500,000
